

PROPOSAL FOR [CLIENT NAME]

Turn WhatsApp conversations into a tracked sales pipeline that your team can actually manage.

This proposal is for a branded WhatsApp CRM workspace designed to help your team respond faster, stop missing hot leads, improve follow-up consistency, and create clear ownership across every customer conversation.

BUSINESS PROBLEM

Leads arrive on WhatsApp, but replies are missed, follow-ups are inconsistent, and there is no clean system for ownership, visibility, or conversion tracking.

PREPARED BY

[Your Name / Agency]

Date: March 24, 2026

What You Are Buying

- One shared WhatsApp inbox for team visibility and clean handoffs
- Lead pipeline tracking from first message to won deal
- Contact management, templates, reminders, and follow-up discipline
- Role-based access for admins and agents
- Hosted deployment, setup, support, and launch guidance

Expected Business Outcomes

- Faster first response times to inbound leads
- Fewer missed opportunities caused by manual chat handling
- Better accountability for who owns each lead
- Higher follow-up consistency across the team
- Better visibility into stalled, active, and closed opportunities

RECOMMENDED INVESTMENT**STARTER**

\$79/mo

For small teams that need one shared WhatsApp workflow with pipeline, contacts, templates, and follow-ups.

GROWTH

\$149/mo

For growing teams that want stronger process control, visibility, accountability, and conversion discipline.

IMPLEMENTATION

\$500+

One-time setup for branding, onboarding, workflow tailoring, migration help, and team launch support.

Delivery Scope and Timeline**Next Step**

The workspace will be configured, branded, tested, and launched for your team. A typical implementation takes 3 to 7 business days depending on custom workflow needs, training, and any required migration or integration work.

Ideal for: real estate teams, agencies, clinics, consultants, education businesses, and service companies using WhatsApp to close leads.

Approve the plan, choose your package, and we will begin setup, workspace configuration, and launch support. The goal is simple: create a cleaner sales process that protects revenue and helps your team close faster.
